

Translating Emergency Knowledge for Kids is improving children's emergency care across Canada through the development of evidence based resources, education, and networking. Visit us at trekk.ca or follow us on social media to learn more:  [trekkca](https://www.facebook.com/trekkca)  [trekkca](https://www.youtube.com/trekkca)  [@trekkca](https://twitter.com/trekkca)

Resources

trekk.ca has more than

700

evidence-based resources for children's emergency care.

3

new Bottom Line Recommendations developed for use in general emergency departments (EDs)

- acute otitis media
- asthma
- procedural pain

478

downloads of our Bottom Line Recommendations on average each month.

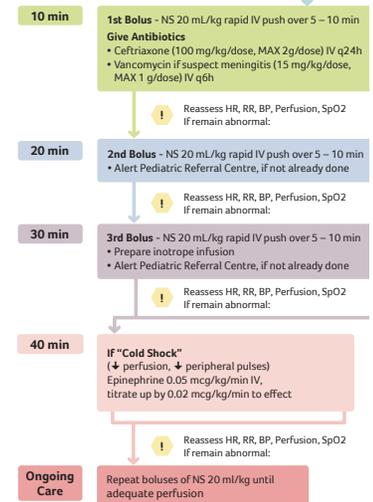

5,739

 total downloads

We were part of an award-winning team that won second place in the Institute of Human Development, Child and Youth Health Talks 2016 video competition for the development of a gastroenteritis video for families.

We developed the first Pediatric Pack (PedsPac) – a bundle of practical tools to recognize and manage a child with sepsis. More coming soon!

Education

24 of these sessions included on-site simulation

we held

34

education sessions across

6

different provinces & territories

to reach a total of

470

ED staff and students
