

## Severe Asthma PedsPac

Led by TREKK Co-Directors Drs. Mona Jabbour (CHEO) and David Johnson (Alberta Children's Hospital), the Severe Asthma PedsPac is the result of a collaboration with content expert, Dr. Dhenuka Radhakrishnan (CHEO), Dr. Suzanne Schuh (Sick Kids Hospital). Development of the Severe Asthma PedsPac involved a rigorous and iterative process, bringing together experts from a variety of specialties (nursing, simulation, emergency medicine, intensive care, and pharmacy). To learn more about the developers, see the References & Development Team document below.

The Severe Asthma PedsPac is currently being used at EDs across Canada to care for critically ill children. TREKK continues to provide training on the Severe Asthma PedsPac at hospital and community EDs. For more information on training and education, contact your local [TREKK Site Representative](#).
