

# Diabetic Ketoacidosis PedsPac

Led by TREKK Co-Directors Drs. Mona Jabbour (CHEO) and David Johnson (Alberta Children's Hospital), the Diabetic Ketoacidosis (DKA) PedsPac is the result of a collaboration with content experts, Dr. Liz Sellers (CHROM), Dr. Dan Metzger (BC Children's Hospital), and Dr. Sarah Lawrence (CHEO). Development of the DKA PedsPac involved a rigorous and iterative process, bringing together experts from a variety of specialties (nursing, simulation, emergency medicine, intensive care, and pharmacy). To learn more about the developers, see the References & Development Team document below.

The DKA PedsPac is currently being used at EDs across Canada to care for critically ill children. TREKK continues to provide training on the DKA PedsPac at hospital and community EDs. For more information on training and education, contact your local [TREKK Site Representative](#).
