

Pain Treatment - Evidence Repository

EVIDENCE REPOSITORIES

Evidence repositories are collections of best available resources and evidence (clinical guidelines, peer reviewed literature, systematic reviews, etc.), collated by our knowledge synthesis team and content advisors. This evidence repository is not intended to be an exhaustive list of resources for a topic, but rather a curated list of current, evidence-based resources, based on expert consensus of relevance and usability for a general emergency department setting. We search databases (Cochrane Library, PubMed, TRIP Database) and web search engines (Google, Google Scholar) to locate evidence. Additionally, hospital websites are browsed for guidance documents, such as clinical practice guidelines (CPG) for healthcare professionals. Every effort is made to identify resources that are open access (i.e. publicly available, free of charge, not requiring a subscription). More information about the creation of our evidence repositories can be found at <https://pubmed.ncbi.nlm.nih.gov/28537762/>

Thank you to the following Knowledge Synthesis team who created this evidence repository:

Samina Ali, MDCM, FRCPC (PEM)

Professor, Pediatrics & Emergency Medicine
Faculty of Medicine & Dentistry
University of Alberta
Edmonton, Alberta

Corrie Chumpitazi, MD, MS

Associate Professor of Pediatrics
Baylor College of Medicine, Division of Emergency
Medicine, Texas Children's Hospital

Lisa Hartling, PhD

Director, [ARCHE](#)
Faculty of Medicine & Dentistry, Pediatrics Dept,
University of Alberta

Amy L. Drendel, DO, MS

Professor of Pediatrics and Medical Director,
Children's Wisconsin Emergency Department Trauma
Center, Medical College of Wisconsin

Naveen Poonai, MSC, MD, FRCPC

Associate Professor, Pediatrics, Internal Medicine,
Epidemiology & Biostatistics, Schulich School of
Medicine & Dentistry
Scientist, Child Health Research Institute
Research Director, Division of Pediatric Emergency
Medicine
