

Diabetic Ketoacidosis (DKA)

Pediatric Packages

Pediatric Packages (PedsPacs) are intended as a step-by-step guide for managing critically ill children. By necessity, the PedsPacs sometimes make judgments about things (such as specific courses of treatment or pediatric doses) that are unclear from the evidence alone, based on the consensus of pediatric experts.

The DKA resources include: Bottom Line Recommendations, Algorithm, Order Set, and Pocket Card. The development of these resources involved a rigorous and iterative process, bringing together experts from a variety of specialties (nursing, emergency medicine, critical care, and pharmacy). These resources use the best available knowledge at the time of publication. However, healthcare professionals should continue to use their own judgment and take into consideration context, resources and other relevant factors. The TREKK Network is not liable for any damages, claims, liabilities, costs or obligations arising from the use of this document including loss or damages arising from any claims made by a third party. The TREKK Network also assumes no responsibility or liability for changes made to this document without its consent. To view the resources and for a list of the evidence that informed the creation of these resources please visit our website [here](#).

Development Team

Thank you to the following **content experts** who led the development of the DKA Algorithm and accompanying tools:

Sarah Reid, MD Pediatric Emergency Physician, Division of Emergency Medicine, [Children's Hospital of Eastern Ontario \(CHEO\)](#), Associate Professor of Pediatrics and Emergency Medicine, [University of Ottawa](#)

Karen Gripp, MD, Medical Director, [HSC Winnipeg Children's Hospital](#), Emergency Department; Section Head, Pediatric Emergency Medicine, Associate Professor, Department of Pediatrics and Child Health, [University of Manitoba](#)

Sarah Lawrence, MD Pediatric Endocrinologist, Division of Endocrinology and Metabolism, [CHEO](#), Associate Professor, Department of Pediatrics, [University of Ottawa](#)

Thank you to the [TREKK Editorial Committee](#) and the following people who supported the development of this resource:

Pharmacy review: Danica Irwin ([CHEO](#), Ottawa) & Tracy Furst ([HSC](#), Winnipeg)

Pediatric Endocrinology review: Dan Metzger ([BCCH](#), BC), Elizabeth Sellers ([HSC](#), Winnipeg) & Nicole Glaser ([UC Davis](#), Sacramento)

Pediatric Emergency Medicine review: Nathan Kuppermann ([UC Davis](#), Sacramento), Mona Jabbour (Co-director TREKK, [CHEO](#), Ottawa)

Pediatric Critical Care review: Anna-Theresa Lobos ([CHEO](#), Ottawa)

TREKK Project Coordinator: Megan Bale-Nick ([University of Manitoba](#)), Chelsea Bowkett ([University of Manitoba](#))

TREKK Editorial Lead: Sarah Reid ([CHEO](#), [University of Ottawa](#))
